UUSINTAPAINATUS 1950-LUVUN LASIESITTEISTÄ

Suomalainen 1950-luvun lasimuotoilu on suosittu keräilykohde niin Suomessa kuin ulkomaillakin. Kuvastoja ei tuolloin julkaistu joka vuosi ja pääasiassa niissä esiteltiin taloustavaraa. Kuuluisaa muotoilua niihin mahtui vain vähän.

Juhlitusta ja voitokkaasta muotoilusta sen sijaan julkaistiin esitteitä. Ne olivat enimmäkseen 2-väripainatuksia, mutta kustannussyistä päädyimme painattamaan esitteet musta-valkoisena. Muuten esitteet on painettu yksi yhteen siten, kuin ne parhaiten ovat A4-sivulle sopineet.

Uskon, että Suomen lasimuseon julkaisema uusintapainatuskokoelma keskeisistä 1950-luvun esineistä täyttää monen suomalaisesta lasista kiinnostuneen pitkäaikaisen toiveen.

Heikki Matiskainen
Museotoimenjohtaja
Suomen lasimuseo

NYTRYCK AV 1950-TALETS GLASBROSCHYRER

Den finländska 1950-talets glasdesign är ett populärt samlingsobjekt såväl i Finland som utomlands. Illustrerade kataloger publicerades inte då varje år och huvudsakligen presenterade man i dem hushållsprodukter. I dem rymdes mycket litet berömd design.

Om hyllad och segerrik design publicerade man däremot broschyrer. De var oftast i 2-färgstryck, men på grund av konstnadsskäl nöjde vi oss med att trycka broschyrerna i svartvitt. För övrigt har broschyrerna tryckts en genom ett så som de bäst har fått plats på A4-sida.

Jag tror, att den av Finlands glasmuseum publicerade nytryckskollektionen av centrala 1950-tals föremål fyller ett önskemål för många intresserade av finländskt glas.

Heikki Matiskainen
Museidirektör
Finlands glasmuseum

REISSUES OF FIFTIES GLASS BROCHURES

Finnish glass from the 1950s has become popular among collectors in Finland and abroad. In those days, illustrated catalogues were not issued regularly every year and they mostly concerned ordinary household wares. Very few famous designs were included.

However, brochures were printed concerning feted and prize winning designs. They were mainly 2 colour productions, but for resons of cost we decided to reissue them in black and white. In other respects they have been printed the way best suited to A4 size paper.

We are sure that the Finnish Glass Museum's collection of reissued brochures of the best glass from the 1950s will fulfill a real need among all those interested in Finnish glass.

Heikki Matiskainen
Director
The Finnish Glass Museum

Iittalan lasitehtaan esitteet on i-lasiesitettä lukuunottamatta painatettu Iittalan lasimuseon kokoelmissa olevien alkuperäisten esitteiden mukaan. Nuutajärven lasitehtaan värilasiesite on puolestaan Nuutajärven lasitehtaan kokoelmista. Muut esitteet ovat Suomen lasimuseon kokoelmista.

Broschyrerna från Iittala glasbruk är förutom i-glasbroschyren tryckta enligt de ursprungliga broschyrerna som finns i Iittala glasmuséets kollektioner. Notsjö färgglasbroschyr är för sin del från Notsjö glasmuseums kollektioner. Övriga broschyrer är från Finlands glasmuseums kollektioner.

With the exception of the i-line brochures, reissues of the Iittala brochures are facsimiles of originals in the Iittala Glass Museum's collections. The Nuutajärvi coloured glass brochure is based on the original in the Nuutajärvi Glass Museum. All the others are from the Finnish Glass Museum's collections.

I DEN RENODLADE BRUKSVARAN DÄREMOT TILLGODOSES FRÄMST DE PRAKTISKA OCH EKONOMISKA KRAVEN. ETT ENKELT DRICKSGLAS HAR EN TJÄNARES SJÄLVFALLNA ANONYMITET OCH OPERSONLIGHET. DET NYA GLAS SOM TIMO SARPANEVA NU SKAPAT OCH SOM IITTALA VISAR UPP FYLLER ETT PÅTAGLIGT BEHOV. DET ÄR BRUKSGLAS; DÄRI ATT DET ÄR AVSETT ATT NYTTJAS PRAKTISKT; DÄRI ATT DET ÄR RESULTATET AV ETT INGÅENDE SAKLIGT STUDIUM. DET ÄR KONSTGLAS; DÄRI ATT VARJE ENSKILD PJÄS HAR SITT ESTETISKA EGENVÄRDE, SIN PERSONLIGHET.
DESSA GLAS ÄR DE FÖRSTA REPRESENTANTERNA FÖR IITTALAS i-LINJE. MED SITT i-MÄRKE VILL BRUKET HÄDANEFTER UTMÄRKA DE KONSTNÄRLIGA ALSTER OCH DET NYTTOGODS, SOM GER ETT TYDLIGT UTTRYCK FÖR VAD SOM »RÖR SIG I TIDEN». SAMTIDIGT INNEBÄR IITTALAS i-MÄRKE EN GARANTI FÖR HÖG KVALITET.

IN PURE ART GLASS THE ARTIST IS SUBJECTIVE, IN IT HE EXPRESSES HIS PERSONALITY AND IDEAS WITHOUT SIDE GLANCES AT THE PUBLIC OR THOUGHT FOR PRACTICAL CONSIDERATIONS.
IN PURE UTILITY GLASS CHIEFLY PRACTICAL AND ECONOMIC REQUIREMENTS ARE SATISFIED. THE TUMBLER HAS THE SERVANT'S SELF-EVIDENT ANONYMITY AND IMPERSONALITY.
A LONG-AWAITED INTERMEDIATE GROUP APPEARS IN THE NEW GLASS CREATED BY TIMO SARPANEVA AND NOW INTRODUCED BY IITTALA. IT IS UTILITY GLASS IN THAT IT IS INTENDED FOR PRACTICAL USE, BEING THE RESULT OF A SPECIALIZED STUDY. IT IS ARTISTIC GLASS IN THAT EACH ITEM IN THE GROUP HAS ITS OWN AESTHETIC VALUE, ITS OWN PERSONALITY.
THIS NEW GROUP IS THE FIRST REPRESENTATIVE OF IITTALA'S i-LINE. WITH THE i-SYMBOL ON THESE OBJECTS THE IITTALA GLASSWORKS WILL HENCEFORTH DISTINGUISH THE ART PRODUCTS AND UTILITY PIECES CLEARLY INDICATIVE OF CONTEMPORARY TRENDS. IITTALA'S i IS ALSO A GUARANTEE OF HIGH QUALITY.

Jo vuonna 1793 perustettu Nuutajärven lasitehdas on vanhin tällä hetkellä maassamme toimivista lasitehtaista. Sen taiteilijat ja lasinpuhaltajat jatkavat lähes kahden vuosisadan takaisia perinteitä ympäristössä, joka on puhtaana säilyttänyt oman erikoisluonteensa. Täältä lähtee maailmalle taidelasi, jossa kansalliseen perintöön yhtyy taiteilijan uutta luova näkemys.

Notsjö-bruket, grundat 1793, är äldst av de i dag verksamma glasbruken i vårt land. Här värnar och utvecklar konstnären och glasblåsaren nära tvåhundra år gamla traditioner i en miljö som genom åren bibehållit sin särprägel. Notsjö-glaset är syntesen av urgammal stiltradition och nyskapande konstnärlig formgivning.

Waertsila-Notsjoe glassworks, established in 1793, are the oldest glassworks in the country. In the beautiful solitude of Finnish woodlands, artisans and craftsmen have devoted themselves for over a century and a half to the creation of the finest crystal which human hands can make.

NUUTAJÄRVEN LASITEHDAS
NOTSJÖ GLASBRUK
NOTSJOE GLASSWORKS

TEHDAS — FABRIK URJALA

Taiteilijat Konstnärer Artists	Hyttimestari Hyttmästare Head Master of the Glass House	Lasinpuhaltajia Glasblåsare Glass-blowers
Kaj Franck **Saara Hopea**	**Uuno Tefke**	**Jaakko Niemi** **Olavi Nurminen** **Armando**

Vuonna 1793 perustettu Nuutajärven lasitehdas on vanhin tällä hetkellä maassamme toimivista lasitehtaista. Sen taiteilijat ja lasinpuhaltajat jatkavat lähes kahden vuosisadan takaisia perinteitä ympäristössä, joka on puhtaana säilyttänyt oman erikoisluonteensa. Täältä lähtee maailmalle taidelasi, jossa kansalliseen perintöön yhtyy taiteilijan uutta luova näkemys.

Notsjö-bruket, grundat 1793, är äldst av de i dag verksamma glasbruken i vårt land. Här värnar och utvecklar konstnären och glasblåsaren nära tvåhundra år gamla traditioner i en miljö som genom åren bibehållit sin särprägel. Notsjö-glaset är syntesen av urgammal stiltradition och nyskapande konstnärlig formgivning.

Notsjoe glassworks, established in 1793, are the oldest glassworks in the country. In the beautiful solitude of Finnish woodlands, artisans and craftsmen have devoted themselves for over a century and a half to the creation of the finest crystal which human hands can make.

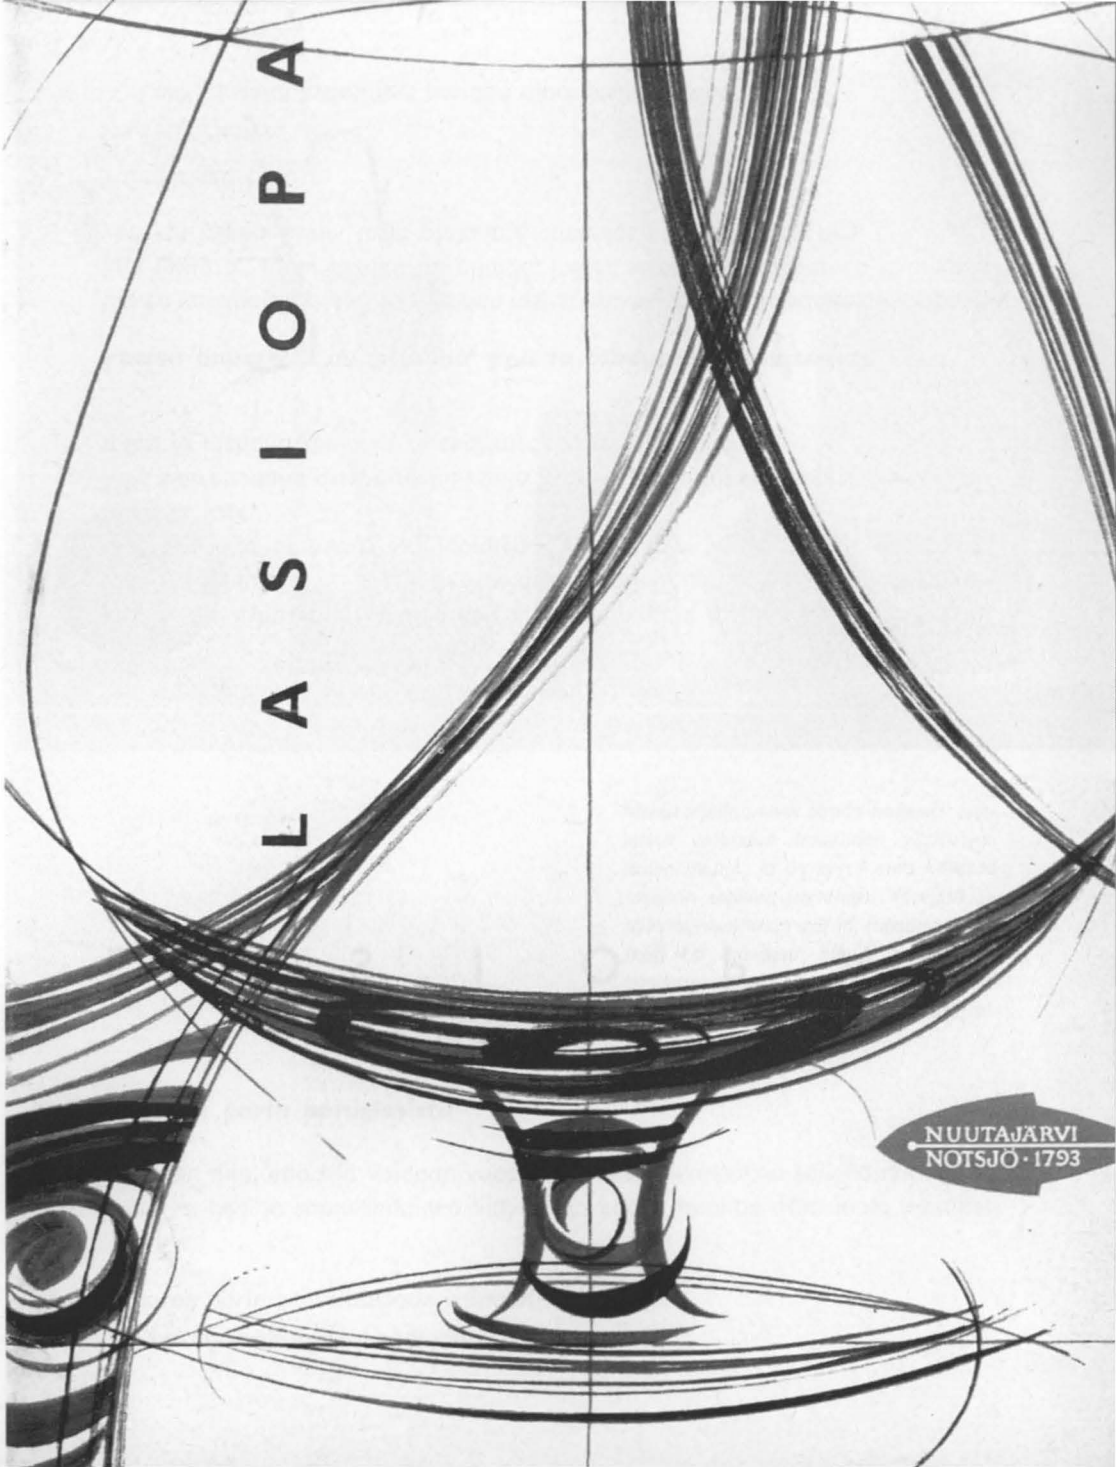
NUUTAJÄRVEN LASITEHDAS
WÄRTSILÄ — YHTYMÄ O/Y

Sanoma Osakeyhtiö

57



Tarjoamisen ilo tulee suuremmaksi, kun pöytään voi panna oikealla hetkellä oikeat astiat. Kaj Franckin kristallinen jääpalamalja ja paksupohjaiset grogilasit puhallettua lasia ovat tarkoituksenmukaisen houkuttelevia ja samalla ne kaunistavat pöydän.

L A S I O P A S

Lasi ei ole astia vaan juoman kehys. Oikein valittu lasi kuuluu hyviin pöytätapoihin. Nuutajärvi — lasin perinteiden, lasin laadun vaalija — on lasivalikoimassaan ottanut huomioon juomien etiketin. Ette tunne juomia ennenkuin tunnette lasit.
Mitä suuremmalla asiantuntemuksella kotiemme lasistot valitaan, sitä kauniimmiksi ja viehättävämmiksi tulevat myös lasien käyttötavat.

Lasien puhdistus on helppoa, kun se tapahtuu suunnitellusti.

Ennen varsinaista pesua suoritetaan lasien esipesu kylmällä vedellä aina silloin, kun niistä on juotu maitoa tai piimää, joiden sisältämä valkuainen kuumassa vedessä hyytyy kiinni lasin pintaan himmentäen lasin kirkkauden.

Varsinainen pesu

1. Työjärjestys:
   Lasit ja muut lasiesineet pestään aina ensimmäisinä.

2. Pesu:

   Lasit pestään yksitellen 50—60° vedessä pehmeällä harjalla, pesupaperilla tai sienellä. Käytetään tavanomaisia astianpesuaineita. Älkää panko lasia pohja edelkä pesuveteen, vaan »koukatkaa» vettä myös lasin sisälle. Näin lasi kuumenee tasaisesti ja särkyminen estyy.

3. Huuhtominen:

   Käytetään 80—90° vettä. Juhlalasit kuivataan pehmeällä pyyhkeellä, arkilasit voidaan panna kuivauskaappiin.

Kotiemme lasistot

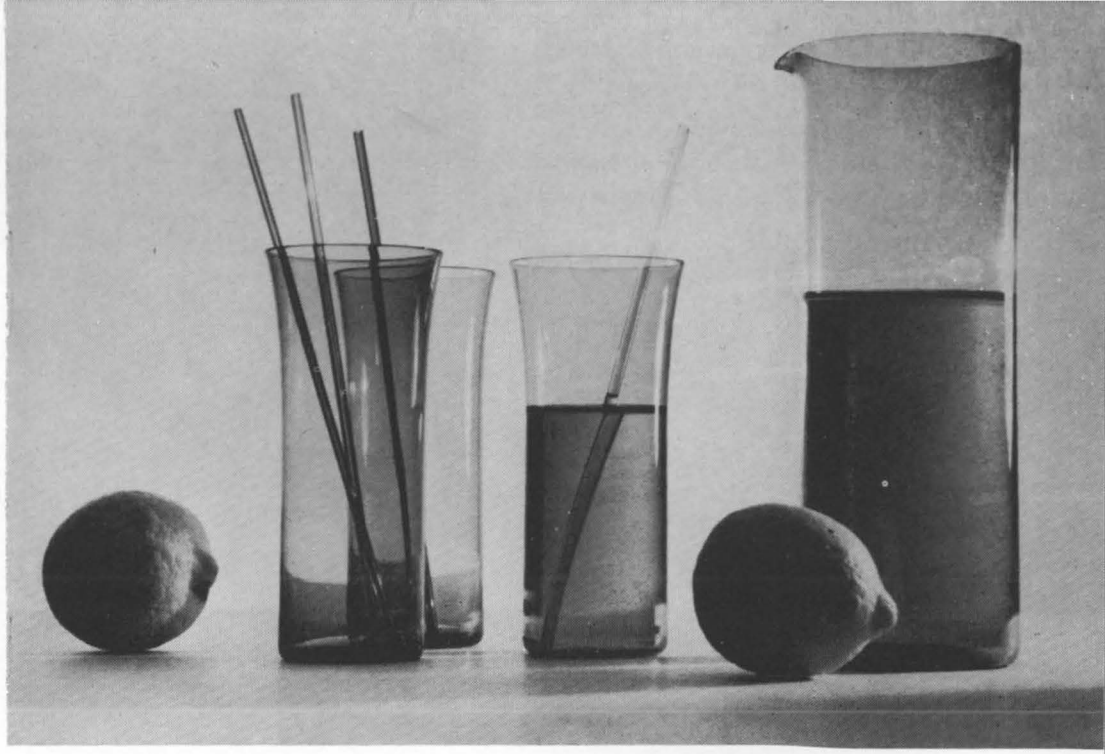
Lasinvalitsijan ensimmäinen näkökohta on lasin käyttötarkoitus ja toinen ratkaiseva tekijä on lasin käyttöympäristö. Vaikka ette arkipöydässänne tarvitsekaan monia erilaisia laseja, kaipaatte niitä vieraspöytäänne — kunnes Teillä ne ovat. Huolella katettuun pöytään kuuluvat myös oikeat lasit oikeaan juomaan. Oli pöydässänne viinejä tai alkoholittomia juomia, tarjoilkaa ne hyvän tavan mukaan aina oikeasta lasista. — »On ensiluokkaisen tärkeää, että viinilasi, viinin viimeinen olinpaikka ennenkuin se liukuu kielemme yli, on mahdollisimman tarkoituksenmukainen», kirjoittaa Kauko Kula Keramiikka ja lasilehdessä N:o 3/1958.

Lasisto valitaan kokonaisuutena, vaikka se usein ostetaankin osina

Täydellisestä kodin lasistosta on helppo valita oikeat lasit

1. kauniin arkipöydän kattamiseen,
2. vieraspäivällisille, kutsujen eri käyttöyhteyksiin,
3. suureen juhlapöytään.

Jos Teillä on käyttökelpoinen, tyyliltään muuhun astiastoon sopiva lasisto kaikkiin näihin tarkoituksiin, ei kodissanne synny koskaan tarjoilutilannetta, josta ette kunnialla ja maineella selviytyisi hyvänä emäntänä.
Tietenkin voitte senkin jälkeen rikastuttaa ja täydentää lasistoanne varsinaista lasiastiastoa täydentävillä lasityypeillä, kuten Rheininviinilaseilla, konjakkikuvuilla, glögi- ja boolilaseilla jne.



Mehutarjoiluun voi saada helposti mieluista vaihtelua kauniiden värillisten lasien avulla, ja on syytä aina käyttää laseihin sopivaa kaadinta. Väreissä on nykyisin valinnan varaa runsaasti, esimerkiksi kuvassa olevia mehulaseja saadaan seitsemää väriä: lila, orvokinsininen, turkoosi, sammalenvihreä, taivaansininen, savu ja rubiini.

Nuoren parin peruslasisto

valitaan niin, että sitä voidaan vuosien kuluessa rikastuttaa säilyttämällä yhtenäisyys, tyyli ja sopusointuinen liittyminen kodin muuhun astiastoon, tekstiileihin jne.

Nuoren parin peruslasistoon valitaan:
10 kpl juomalaseja jokapäiväistä käyttöä varten.

59

5 kpl seuraavia lasikokoja:
6 cl lasi, josta juodaan snapsi, vermutti, sherry, madeira ja muut väkevät viinit.
9 cl lasi cocktaileja, konjakkia ja likööriä varten.
10—12 cl jalaton lasi, josta juodaan grogit, olut ja mehuja.

Kodin kasvaessa tapahtuvat lasisto-täydennykset:

3 cl likööri- ja konjakkilasit
12 cl laakeat tai korkeat shampanjalasit
12—15 cl vichylasit
20 cl jalalliset olutlasit

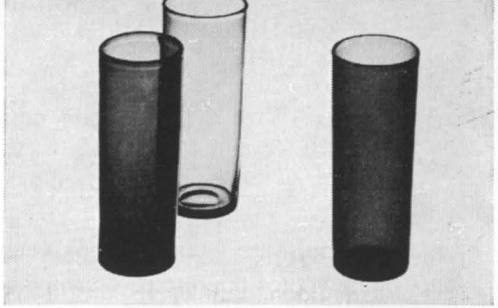
Näin täydennetyllä lasistolla perheenemäntä selviää kunnialla ja edustavasti jo kaikista niistä tilaisuuksista, joita vieraanvarainen suomalainen koti viljelee.

Kun seurustelumuodot rikastuvat kodissanne ja persoonalliset omat tarjoilutavat vakiintuvat hankitaan erikoiskäyttöön tarkoitettuja laseja,

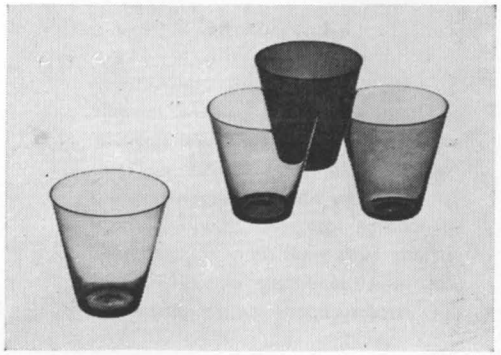
kuten

Rheininviinilaseja, konjakkikupuja, booli- ja glögilaseja. Tässä vaiheessa voidaan myös valita kirkkaille lasisarjoille vaihtoehtoiseksi värillisiä laseja — mieluiten yksinäisinä yhtä käyttötapaa koskevina sarjoina. Esim. värilliset cocktaillasit voivat piristää juhlianne omalla kauniilla tavallaan.

Driivattu lasi
on luonteeltaan eniten käsityönomaista ja siten myös persoonallista. Sen reuna on paksuhko ja epätäsmällinen. Driivattu lasi esiintyy erikoisesti taidelasivalikoimassa.

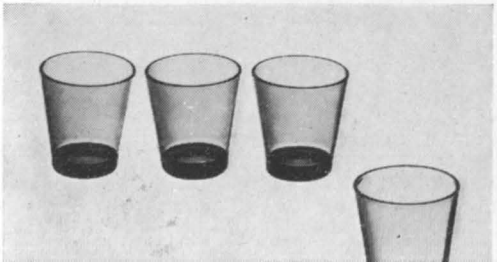


Puhallettu lasi
on ohutta ja herkkää. Se valmistetaan Nuutajärvellä kokonaan käsityönä. Upokkaasta eli sulatusuunista otetaan puhalluspillin päähän sulaa lasimassaa, jota ns. »postia» sitten puhalletaan ensin vapaasti ja sen jälkeen muottiin painaen. Tekotavan mukaan jaetaan puhallettu lasi kolmeen ryhmään: 1. kiinnipuhallettu, 2. kierretty ja 3. vapaamuotoinen. Ryhmään 3. kuuluu yleensä taidelasi.



Eri lasilaadut — kuinka ne syntyvät ja miten niitä käytetään tarkoituksenmukaisimmin?

Kristallilasi
on jalointa lasia. Se on painavaa ja kirkkaasti helähtävää, kirkasta ja pehmeätä, joka soveltuu hyvin hiottavaksi. Hiontakoristelu on kristallille tyypillistä, koska siinä voidaan käyttää kristallin välkehtimistä hyväksi.

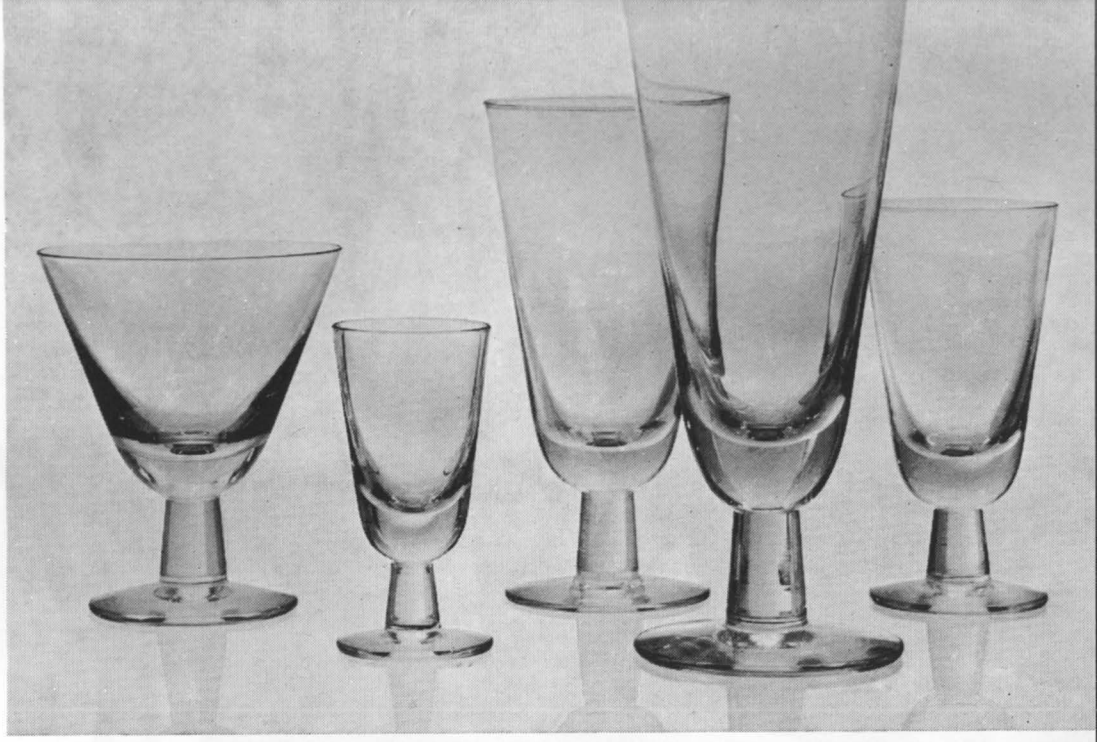


Puristelasi
on tukevaa ja nimenomaan arkikäyttöön sopivaa lasia. Nuutajärven nykyisen hyvän puristelasimassan ansiosta saadaan puristamalla sileäpintaista täsmällisen muotoista käyttölasia, joka on hyvin kestävää.

Lasistosarjoja
joita suositellaan kotien lasistoiksi

Lasistot voivat käsittää nykyisin hyvin erilaisia kokonaisuuksia: lasien koot vaihtelevat 3 cl:sta aina 40 cl:an. Valittaessa kodin lasistoa onkin syytä heti ottaa huomioon, kuinka laajaksi lasistokokonaisuuden haluaa myöhemmin kartuttaa. Lasistojen joukossa on nykyisin valittavana sellaisiakin joihin kuuluu ainoastaan neljä peruskokoa: 6, 9, 12 ja 20 cl lasit. Tällaisen lasiston täydennykseksi voi tietenkin aina valita joitain erikoismalleja muista tyyliin sopivista sarjoista.

Esittelymme alkaa viereiseltä sivulta.



NUUTAJÄRVI . SAARA HOPEA . ASTOR

3 cl konjakki
6 cl madeira- ja sherry
8 cl cocktail
12 cl puna- ja valkoviini
15 cl shampanja
20 cl olut

Kun tarjoamme vichyä, on käytettävissä jopa kymmeniä erimallisia ja erivärisiä laseja, joten vichyvesilasinkaan ei koskaan tarvitse pöydällämme poiketa tyylistä. Myös pinottavat pakkauksissakin myytävät lasit sopivat hyvin tähän tarkoitukseen. Vichyvesilasin koko on 12—15 cl.

62

NUUTAJÄRVI . SAARA HOPEA . KARI

6 cl konjakki, madeira ja sherry
9 cl cocktail
12 cl puna- ja valkoviini

Kautta maailman on tullut tunnetuksi Nuutajärven lasi aidon yksilöllisen lasin nimenä. Milanon Triennalessa v. 1957 sai Kaj Franck Nuutajärven lasista GRAND PRIX'in ja Saara Hopea HOPEAMITALIN. Nuutajärvellä elävät lasinvalmistuksen ikivanhat perinteet — siellä ovat lasin ihmeelliset värit syntyneet uudelleen kauneimmilleen.

Cocktailin voi tarjota joko värillisestä tai kirkkaasta lasista. Kuvassa on värikkäällä marjalla koristettu cocktail kirkkaassa lasissa. Jos käytämme värillistä lasia, on meidän syytä ottaa lasinkin väri makuun mukaan.
